Mai multe state au confirmat că vor folosi vaccinuri ARNm pe animalele lor.

Alimentele modificate genetic pot fi acum comercializate ca fiind non-OMG.

Into Meat to get you Vaccinated! God help us

Tom R.
@RenzTom

to be clear - at this point there are zero states requiring informed consent for "vaccine food". While I would argue that it must be done under existing law I absolutely do not believe that will happen. If [#Missouri](#) will pass [#HB1169](#) the informed consent and disclosure requirements will force the truth about this everywhere. EVERYONE MUST fight for this bill and tell the lobbyists on the list to stand with LOCAL farmers and [#WeThePeople](#) instead of [#BillGates](#) the [#CCP](#) & the [#WEF](#) [#VaccineFood](#)

BTW - here is an article from the year 2000 talking about integrating vaccines into food... page 3 has a nice picture of how to make an edible vaccine... but don't worry - it's just [#ConspiracyTheories](#) ... right? Wanna bet a [#DiedSuddenly](#) on it? @VigilantFox

MRNA GENE THERAPY IS COMING TO THE FOOD SUPPLY & YOUR MARKET
